 - haemorrhoids

Royallet RM-1000

Royallet Elite Aromatic

Royallet Elite

Royallet Excellence

Tired of toilet paper? Or just looking for a fresh alternative?

Royallet Electronic Bidets introduce you to a new level of comfort, luxury and hygiene. Now you can have that shower-fresh feeling all day long! Wiping with toilet paper leaves behind minuscule residue which can cause irritation. Just as you wash your hands with water, so too will you find that using a bidet is the most comfortable and hygienic way to clean after toileting.

Royallet Electronic Bidets - the ultimate in bathroom luxury and comfort.

Features available:*

His & Hers Nozzle

The Wash function features a solid stream of water to thoroughly clean the posterior. The Bidet nozzle provides a softer, gentler cleaning that is more suited for feminine hygiene.

Warm seat

Your Royallet will always have a warm welcome for you. With adjustable seat warmth, there'll be no more cold surprises on winter mornings.

Warm air drying

Warm air gently dries any moisture. 4 step temperature control for optimum comfort.

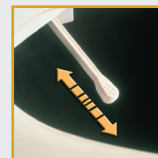

Variable water pressure/temperature and Nozzle accuracy positioning.

Personalise your comfort with adjustable settings for temperature, pressure and nozzle positioning.

Sensor activated seat & hydraulic closing.

The Royallet has a special sensor so that the bidet only activates once someone sits on the seat. The hydraulic lid and seat closes quietly, and gently, with a simple touch.

Massage

The nozzle moves back and forth automatically, improving cleaning efficiency and blood circulation in capillaries, which helps prevent haemorrhoids and constipation.

Rhythmic pulse

During washing, the water pressure cycles repeatedly from strong to weak. Using this in combination with the Massage function gives a good thorough cleaning.

Air Deodorizer

The air deodorizer helps to remove any unpleasant odours.

Energy Saving

The energy saving function sets the various temperatures at the lowest sustainable levels to minimize power usage.

Anti Microbial Seat

The seat and nozzle are formulated from Anti-Microbial materials for germ resistance.

Self cleaning nozzles

Nozzles perform a self cleaning rinse before and after each use.

*Some features not available on all models. Please check comparison table on back.
